Full-Stack Software Development , Teach2Give (The Jitu) (2025)
Software Development , PLP Academy
Artificial Intelligence (Part-Time) , Moringa School

PROFESSIONAL SUMMARY

Full-stack software developer with expertise in building responsive web and mobile applications using React, Next.js, and Node.js. Experienced in REST API development, secure authentication, and managing SQL and NoSQL databases. Proven ability to deliver client-focused solutions following Agile methodologies.

WORK EXPERIENCE

Teach2Give (The Jitu) 2025
Software Developer

- Completed a structured full-stack development program with mentorship from senior engineers
- Built and shipped features in a collaborative team environment following Agile workflows
- Applied best practices in code reviews, clean code principles, and version control via Git/GitHub
- Earned certification upon successful completion of the software development program

Remote 2024–Present
Freelance Software Developer

- Designed and developed responsive web and mobile applications using React, React Native, and Next.js
- Built and integrated RESTful APIs using Node.js, Express.js, and Prisma ORM
- Implemented secure user authentication flows using JWT and NextAuth
- Managed PostgreSQL, MongoDB, and MySQL databases across diverse client projects
- Deployed production applications to Vercel and Render with CI/CD pipelines
- Collaborated directly with clients to translate business requirements into functional solutions

EDUCATION

Murang'a University of Technology, Murang'a, Kenya 2026
Bachelor of Science in Information Technology
