SKILLS

Technical Skills

- Systems & User Support (technical troubleshooting, application support, user-focused problem solving, issue investigation)
- Operating Practices (Git/GitHub, Agile methodologies, code reviews, collaborative delivery, deployment workflows)
- Applications & APIs (JavaScript, TypeScript, React, React Native, Next.js, Node.js, Express.js, REST APIs)
- Databases (PostgreSQL, MySQL, MongoDB, Prisma ORM, data management)
- Security Foundations (JWT, NextAuth, secure authentication flows, access-aware application development)

Soft skills

- Problem Solving
- Time Management
- communication skills

CERTIFICATIONS

- Full-Stack Software Development, Teach2Give

## PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience developing and deploying software solutions, troubleshooting application issues, managing relational and NoSQL databases, and supporting client requirements from development through deployment. Strong foundation in problem-solving, secure authentication, REST APIs, version control, documentation, and collaborative Agile workflows. Interested in applying these skills to IT systems support, service operations, infrastructure reliability, and continuous improvement.

## EDUCATION

Murang'a University of Technology, Murang'a, Kenya (2022-2026)
Bachelor of Science in Information Technology

## WORK EXPERIENCE

Freelance (August 2026 - Present).

Software Developer at KoneqtMe

- Investigated and resolved application issues across client projects, ensuring seamless implementation of support requirements.
- Deployed production web applications to the cloud with CI/CD pipelines
- Collaborated directly with clients to translate business requirements into functional solutions
- Managed MySQL database.

Teach2Give (The Jitu). (May 2025 - July 2025) 3 months.

Software Developer

- Completed a structured full-stack development program with mentorship from senior engineers
- Built and shipped features in a collaborative team environment following Agile workflows
- Applied best practices in code reviews, clean code principles, and version control via Git/GitHub
- Earned certification upon successful completion of the software development program

## PROJECTS

Task Management and Collaboration Platform

Developed a platform for organising tasks, tracking progress, and

(The Jitu)
- Artificial Intelligence (Part-Time), Moringa School
- Software Development, PLP Academy
- SPSS and STATA, Kesap Research Centre

supporting team collaboration. Features include task workflows, progress dashboards, categorisation, filtering, notifications, and team management.
